

eG Innovations

The End-to-End Monitoring Company for Healthcare

A technology health map to ensure that technology works **for** doctors, clinicians, and patients and not **against** them. Our patented AI automatically cleanses your systems when problems develop.

HealthPulse: Monitoring Excellence in Healthcare IT

eG Innovations leverages AIOps to build a technology health map and ensure seamless support for doctors, clinicians, and patients.

eG Enterprise ensures the delivery of efficient patient care from anywhere.

eG Enterprise is your primary network care physician; we diagnose issues and solve them or point you to a specialist.

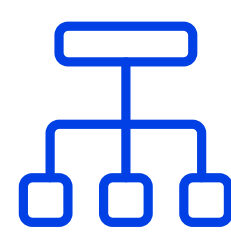

eG Innovations provides performance baselines and KPIs to help you alleviate network stress.

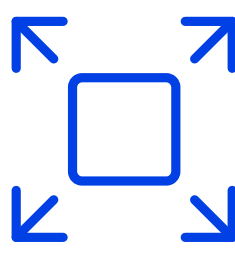

Performance Stability

Enhanced delivery of critical healthcare applications and desktops
